

## Mini Sudoku

Number 1

1		3		4	
			1		2
6	3			5	
	4			1	6
3		2			
	1		5		3

To solve Mini Sudoku you have to look for number patterns. The puzzle is divided into rows (going across), columns (going down) and shaded boxes of six small squares.

The numbers 1 to 6 must appear once only in each row, column and box.

Work out which numbers are missing from each square and see which numbers will fit.

Remember no number can appear more than once in any row column or box.

Number 2

	2			5	6
	4				2
	5	1			
			6	1	
4				2	
3	1			6	

Number 3

1	3				6
		2			3
	5		4		1
2		4		6	
5			6		
4				5	2
